

Joinery

bml

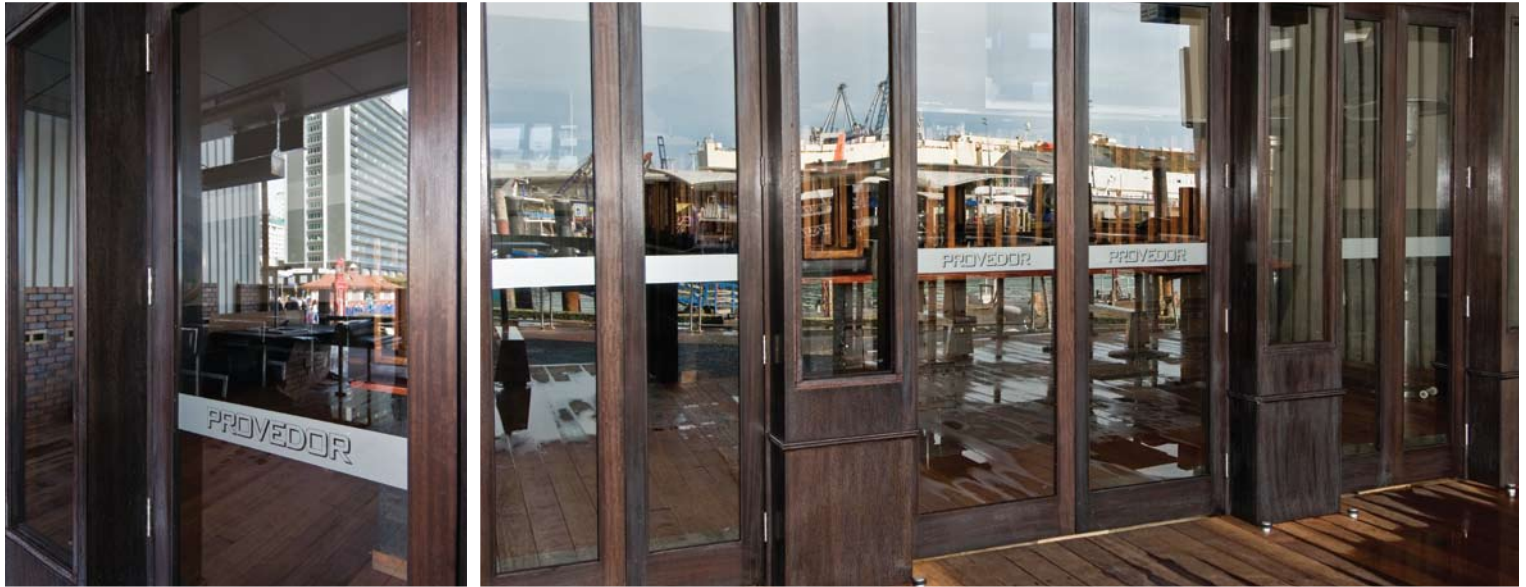

BML Builders is a specialist in replicating traditional and period timber joinery, including internal doors, window frames, entrance doors, French doors and stairs.

To comply with almost all possible requests, all types of timber are used. Wherever possible BML uses timber from verified sustainable sources.

Excessive attention is paid to detail to satisfy the highest standards of our clients. This combined with pre-primed joinery means low maintenance costs in the future.

To ensure a complete job, delivery and installation is an option you can ask to be included in the price quoted.

PROVEDOR

case study: Providor Bar

Richard has used BML Builders over the last two and a half years to provide building and joinery services for their hospitality businesses.

Challenges:

To work around an open hospitality venue.

To work from a verbal idea and put this into a workable solution without a clear price being available prior to implementation.

What Happened:

The product was designed by BML after consultation with the owner. All work was created off site within the factory and was installed within a single day.

Outcomes:

Custom joinery was installed and fitted within the day to a high standard. Off site product was delivered and handled with care prior to installation.

Client Comments:

Richard was "amazed at what BML did in only one day" and that he would "definitely use BML again for future joinery work".
